

# INTERNAL COMPLIANCE PROGRAM

Cynthia M. Reyes  
Head, Sales - Inchem  
Vice Chairman - PDEA-CPIP

# PDEA-CPIP

The PDEA-CPIP (Philippine Drug Enforcement Agency-Chemical and Pharmaceutical Industry Partnership) is a growing organization of chemical and pharmaceutical industries who committed themselves to take active part in the prevention of chemical diversion and illegal trade of essential chemicals and controlled substances.

This effort is being undertaken under the Compliance Service of PDEA to engage the industry against chemical diversion since 2008. We have conducted regulatory awareness and MOA signing to chemical and pharmaceutical industry nationwide.

# PDEA-CPIP VISION

“To be a committed, effective and responsible partner of PDEA for a drug-free Philippines”

# PDEA-CPIP MISSION

- To ensure adherence and compliance to the principles and objectives of the PCPICOP and other relevant laws, mandates and regulations;
- To establish a proactive and harmonious environment in addressing the various concerns of the industries relative to the regulatory requirements of controlled substances;
- To actively participate in the programs of PDEA-CPIP in preventing chemical diversion;
- To promote strong alliance among and between members and other stakeholders through active collaboration and co-operation; and
- To be dynamic and socially responsive to the needs of the community

# PCPICOP

The Philippine Chemical and Pharmaceutical Industry Code of Practice (PCPICOP) is in consonance with the Memorandum of Agreement (MOA) entered into by and between the various chemical and pharmaceutical associations and entities and the PDEA. The PCPICOP has established uniform procedures and common approach to prevent the diversion of precursor which will facilitate voluntary notification of suspicious transactions by the industry to law enforcement agencies.

# PCPICOP OBJECTIVES

- The establishment of a common system of practice that will be applied by the industry in handling chemicals to prevent diversion at source level;
- The development of an enhanced partnership and alliances between the industry and PDEA; and
- The training and education of company's staff to heighten awareness on the possibility of chemicals to be diverted for illicit purposes.

# PDEA REGULATORY FORUM

Inchem Conference Room  
June 22, 2011

Resource Speaker:

Ms. Helen Maita Reyes  
Director, Compliance Service

Director Helen Reyes discussed about the regulatory control on the import of controlled precursors and essential chemicals.
