

List of Accepted Presentations for EVT^M Asia 2026

2026/07/31

Poster No.	Title	First Author	Affiliation
P01	Environment and Preparedness for Trauma Care in Centers Equipped with a Hybrid Emergency Room System	Akira Endo	Hokkaido University, Japan
P02	Protocolized nurse-led surveillance during resuscitative endovascular balloon occlusion of the aorta (REBOA): A single-center protocol experience	Soo Kyung Kang	Dankook University Hospital, South Korea
P03	When TEVAR can be deferred: damage control laparotomy before TEVAR in grade IV blunt thoracic aortic injury with contained extravasation	Dongmin Seo	Ajou University / Ajou University Hospital, South Korea
P04	Sustained vascular access competency after ultrasound-guided peripheral intravenous cannulation training among emergency nurses	Tien-Tien Liu	National Taiwan University / Linkou Chang Gung Memorial Hospital, Taiwan
P05	Utility of computed tomography brain for predicting intracranial hemorrhage in mild traumatic brain injury with moderate risks in a tertiary care center in Thailand	Manutsanun Malithong	Khon Kaen University, Thailand
P06	Truly Simultaneous Hemorrhage Control by Surgery and Transcatheter Arterial Embolization in a Hybrid Emergency Room System: A Case Report	Taiki Moriyama	Hyogo Emergency Medical Center, Japan
P07	A bowel-sparing strategy using transcatheter arterial embolization and open abdominal management for traumatic mesenteric injury with active extravasation: a case report	Kohei Kusakari	Eastern Chiba Medical Center, Japan
P08	Timing of Tracheostomy and the Risks of Ventilator-Associated Pneumonia in Intubated Multiple Trauma Patients	Ploytip Jansiriyotin	Chiang Mai University / Khon Kaen Hospital, Thailand
P09	The role of intra-aortic balloon pumping in the era of impella as an adjunct to extracorporeal cardiopulmonary resuscitation	Yusuke Hamada	St. Marianna University, Japan
P10	Machine Learning–Based Correlation of Venous Morphology with Hemorrhagic Shock Stages Using Volumetric M-Mode Ultrasound in a Swine Model	Ariyan Tabesh	University of California, USA
P11	Essential skillsets for interventional radiologists as trauma team members: a surgical perspective	Ichiro Okada	Nippon Medical School Hospital, Japan
P12	Veno-venous ECMO using a single-site dual-lumen cannula with differential lung ventilation for refractory respiratory failure after blunt chest trauma	Atsuki Kume	St. Marianna University, Japan
P13	Endovascular Treatment of Pediatric Blunt Traumatic Aortic Injury with Laparotomy-Assisted Access and n-butyl-2-cyanoacrylate Embolization	Soh Ueshima	Nippon Medical School Chiba Hokusoh Hospital, Japan
P14	CT-Guided Selective REBOA as a Salvage Bridge to TEVAR in Catastrophic Grade IV Blunt Traumatic Aortic Injury	Tomoki Yukawa	National Hospital Organization Sendai Medical Center, Japan
P15	Improving ECMO care among emergency department nurses: a quality improvement project	Chih Ping Chu	Chang Gung Memorial Hospital, Taiwan
P16	Hidden time bomb: A case of massive hemothorax caused by thyrocervical trunk injury treated with transcatheter arterial embolization	Fumi Inamasu	Oita University / Oita Prefectural Hospital, Japan
P17	Arterial Embolization for a Giant Subcutaneous Hematoma Following Trauma in a Patient with Neurofibromatosis Type 1	Murakami Hiromoto	Hyogo Medical University, Japan
P18	Perioperative bleeding management for open window thoracostomy in necrotizing pneumonia under veno-venous ECMO support: two case reports	Yoshiro Watanabe	Saiseikai Utsunomiya Hospital, Japan

List of Accepted Presentations for EVT^M Asia 2026

2026/07/31

Poster No.	Title	First Author	Affiliation
P19	Optimizing hybrid er for trauma patients: direct ct protocol and a case of external iliac arteriovenous fistula.	Kai Takayuki	Aichi Medical University, Japan
P20	TEVAR and TAE for severe blunt polytrauma with traumatic thoracic aortic injury and pulmonary arterial bleeding: a case report	Takaaki Mori	Oita University Hospital, Japan
P21	Revascularization Strategy for Peripheral Vascular Injury Based on Arterial Patency: Predictors of Endovascular Treatment Failure	Kazuki Hagiwara	Yamanashi Prefectural Central Hosipital / Nippon Medical School, Japan
P22	REBOA-assisted damage control surgery for ruptured pancreaticoduodenal arcade aneurysm complicated by ischemic biliary injury	Takamichi Nishida	Teikyo University, Japan
P23	Prehospital ECPR for Refractory Out-of-Hospital Cardiac Arrest: A 21-Case Feasibility Experience of the Utsunomiya Model	Kei Kimoto	Saiseikai Utsunomiya Hospital, Japan
P24	Creating a Survivable Transport Window: Early Operational Experience Establishing a Partial Aortic Occlusion Capability During Prolonged Combat Evacuation in Ukraine	Kateryna Maslyak	Armed Forces of Ukraine, Ukraine
P25	Balloon Before Scalpel: Hybrid Management of a Penetrating Iliac Artery Pseudoaneurysm	Nut Tongbuasirilai	Mahidol University, Thailand
P26	From Rescue to System Change: A Pediatric Trauma VV-ECMO Success Driving Development of a Trauma ECMO Awareness–Alert–Activation (T-ECMO AAA) Pathway	Tongporn Wannatoop	Mahidol University, Thailand
P27	Elderly Versus Non-Elderly Patients Undergoing REBOA for Severe Blunt Abdominal or Pelvic Trauma in Japan	Hiroka Hosaka	Teikyo University, Japan
P28	Early Involvement of the Interventional Radiology Team in Trauma Resuscitation: Two Cases Highlighting Multidisciplinary Decision-Making	Nobuaki Kiriū	National Defense Medical College Hospital, Japan
P29	Resuscitative embolism with N-butyl-2-cyanoacrylate for ruptured inferior pancreatico-duodenal aneurysm: a case report	Norifumi Matsuda	Sapporo Higashi Tokushukai Hospital, Japan
P30	Occult Complete Right Subclavian Artery Transection After Motorcycle Trauma: Failed Endovascular Attempt and Open Bailout	Wei-Hsun Chen	China Medical University Hospital, Taiwan
P31	Laparotomy combined with thrombectomy for superior mesenteric venous thrombosis and portal venous thrombosis: a case series	Hirofumi Ohno	Teikyo University, Japan
P32	Surgical intervention and outcome of complex liver injuries with bile duct injuries: A case report	Tanapon Supapon	Phrapokklao Hospital, Thailand
P33	Anticipating Ventilatory Failure in Devastating Open Thoracic Trauma with Exposed Lung: A Case Report	Udit Umesh Umrani	Kasturba Medical College (KMC) Manipal, India
P34	Extracorporeal CPR can save lives of combat casualties at a Role 2 medical treatment facility (Case series)	Viktor Reva	S. M. Kirov Military Medical Academy, Russia
P35	Temporary Limb Preservation and Extracorporeal Perfusion in Combat Casualties with Major Arterial Injuries	Viktor Reva	S. M. Kirov Military Medical Academy, Russia
P36	REBOA in War and Peace: Parallel analysis of Military and Civilian Trauma Patients	Viktor Reva	S. M. Kirov Military Medical Academy, Russia

List of Accepted Presentations for EVT^M Asia 2026

2026/07/31

Poster No.	Title	First Author	Affiliation
P37	Surgeon 360-degree: a hybrid advisory model for multimodal trauma management, illustrated by blast and pancreatic injuries	Ryo Ishizawa	Tokyo Metropolitan Tama Medical Center / International University of Health and Welfare Narita Hospital, Japan
P38	Computed tomography in a Hybrid Emergency Room System changed the hemostatic strategy from open surgery to endovascular treatment for traumatic abdominal aortic injury: a case report	Hiroto Kasai	Yamanashi Prefectural Central Hosipital, Japan
P39	Endovascular and hybrid trauma management in disaster medicine: a systematic review	Duygu Ege Zilan	University of Health Sciences / Istinye State Hospital, Türkiye
P40	Partial REBOA as a bridge to definitive hemostasis in refractory duodenal ulcer bleeding: a three-patient case series	Jyun-Long Chen	Chang Gung Memorial Hospital, Taiwan
P41	Hemorrhagic contaminated ascites after laparoscopic cholecystectomy: a staged endovascular-first, then surgical-drainage strategy: a case report	Takuto Shimada	Kasugai Municipal Hospital, Japan
P42	CT-guided treatment strategy in the Hybrid Emergency Room for exsanguinating polytrauma with multiterritory arterial bleeding: a case report	Karena Tanaka	Saiseikai Yokohamashi Tobu Hospital, Japan
P43	Institutional Variation in REBOA Outcomes: The Case for Standardized Programs and Partial Occlusion Strategies	Ernest E. Moore	Denver Health, USA
P44	Transition from Endovascular Therapy to Damage Control Surgery Following Failure of Angioembolization for Delayed Traumatic Hepatic Pseudoaneurysm	Thara Jill Sy Añasco	Southern Philippines Medical Center, Philippines
