

# Breakout Session 1: Strategic Trade Control Legislation

Asian Export Control Seminar

18 February 2015

# STC Legal Context

- Emergence of common STC legal elements
- Importance of adapting common elements to local/regional political, economic, and other strategic considerations
- Common challenges:
  - Security-economy balancing
  - Policy hierarchy
  - Resource constraints

# Partners Experiences

- STC “Brand” issues
  - External
  - Internal
- Resource constraints
- Implementation realities
- Interagency and Parliamentary and Industry cooperation/buy-in
- Information sharing
  - Internal
  - External (e.g., GSMA)
- ITT

# Discussion Questions

- Single Licensing or Interagency Committee?
  - Single is efficient; however...
    - May lack multidisciplinary inputs: technical, foreign policy, national security, diplomatic, and economic perspectives
  - Hybrid approach
- Importance of enterprise outreach?
  - Critical, but need to do it smarter and less expensively
  - Two-way street aspect of industry engagement

# Discussion Questions (continued)

- Implementing ITT?
  - Perhaps biggest strategic trade control challenge
  - Outreach to academia is key
  - Identifying new tools
  - Safety in numbers: everyone in the group shared their struggles with developing ITT strategies
