3. Classification service : Self-classification

- Searching for the exact control number by reviewing the relevant control specifications and going through the interactive question answering

The screenshot shows a web interface for self-classification. On the left, there is a detailed view of a control item (2B001.b) with a photo and text. The main area displays a list of control items with their specifications and interactive question answering options (YES/NO). A legend on the right explains the numbered steps: 1. Item Specification, 2. Control Number, 3. Control Specification, 4. Definition of Term, 5. Interactive Answering.

3. Classification service : Self-classification

- Checking the result

The screenshot shows the 'Checking the result' page. It displays search criteria: 검색어: 공작기계, 통제번호: 2B001.b.2, 국제재제: WA. Below this, there is a list of items with a photo of a machine tool. A '검색' (Search) button is visible at the bottom.

- Printing out the result

The screenshot shows the 'Printing out the result' page, which is a self-classification form. It includes a header with the company name and representative, a table for item specifications and comparison, and a section for the self-classification registration number and date. The date is 2016년 03월 07일.
